

Senior Animal Technician

Department of Zoology

Closing date: 12 January 2025

Job Reference: PF44454

Senior Animal Technician

Salary:

£26,642 - £30,305

Contract:

Permanent

Location:

Cambridge

Department:

Zoology

Responsible to:

Scientific Support Coordinator

Working Pattern:

Full-time, Monday – Friday and one or two weekends per month, working on-site

Purpose of the role

The Department of Zoology is a large and complex one with around 250 staff, a final year undergraduate class of around 80, around 15 fellows on independent competitive grants and 80 graduate students studying for PhD degrees. The Department has received the highest ratings for teaching and research. The Department currently holds about 66 research grants, totalling £22.5 million with an annual research grant expenditure of around £5 million. The department occupies space over several buildings and comprises more than 10,000m². The role will manage a departmental facility providing a service to researchers using animal cultures, plus teaching staff.

The role provides technical support, regarding the use of animal cultures (e.g. fish and insects), to research teams and teaching staff in the department. You will report to the Scientific Support Coordinator and supervise one junior scientific support technician, together you will provide a standard animal culture care service/facility for the department. You will also be responsible for maintaining the departmental insect and aquaria facilities and will provide assistance with animal-culture specific practical classes for undergraduate teaching. You will help the scientific support team with basic food preparation, autoclaving etc

Key Responsibilities

- Responsible for ensuring departmental needs are met by this service, which covers: the departmental aquaria housed in the OMB and Austin Building, the ant insect facility in the main building, and oversight of the controlled temperature rooms which are used for hibernation, new insects or quarantine areas as necessary.
- Manage the departmental budget for the aquaria and insect facilities.
- Prioritise and schedule tasks, and liaise with the Scientific Support Coordinator and Junior Scientific Support coordinator ensuring that basic daily feeding and cleaning tasks are fulfilled (including weekends/holidays as required); to include all animal cultures housed within the ant room or departmental aquaria, plus other cultures as agreed with Lab and Facilities Manager.

Key Responsibilities (Continued)

- Responsible for ensuring all equipment/food/supplies needed by the departmentally owned facilities (ant room and aquaria) are ordered and appropriately stored, including management of a budget. May be required to collect supplies of animals from either appropriate suppliers, or from local ponds/streams/rivers as needed.
- Ensure compliance with conditions laid down by the local NACWO or Home Office Inspector, and will maintain detailed records, as required by the Home Office, for the aquaria as required.
- Compose standard operating procedures and instructs junior scientific support coordinator and other users appropriately on these for all facilities.
- Keep a record of all staff and students who are regularly working with insect cultures and notifies the DSO of new starters/leavers – such that Occupational Health may be kept informed.
- Train and supervise the animal work carried out by the junior scientific support coordinator
- Ensure that all facility equipment (housed in the aquaria and controlled temperature rooms) is maintained appropriately and serviced regularly. Liaises with Labs and Facilities Manager/Departmental Safety Officer and Scientific Support Coordinator to ensure that safety rules and regulations are followed, and that relevant records are kept.
- Provide assistance to Chief Teaching Lab Technician with reference to specific animal-culture based practical sessions for undergraduate students.
- Maintain stock of the appropriate cultures, expands the cultures as needed for practicals and provides the livestock to the academic running the practical in the formats requested.
- Assist with the practical sessions as needed.
- Ensure that Facility Risk Assessments/COSHH forms are kept up to date.
- Responsible for ensuring all departmental facility users attend relevant safety training courses if necessary.
- Ad hoc support to the Scientific Support Team (such as autoclaving, food prep).
- Other relevant duties as assigned by the Labs and Facilities Manager or Departmental Administrator.

Person Specification

Criteria	Essential	Desirable
Experience		
Previous experience in a relevant environment.	✓	
Knowledge & Skills		
Knowledge of the relevant equipment, procedures and animal facilities	✓	
Some Health and Safety knowledge/experience	✓	
Good IT skills.	✓	
Good communication skills to enable explanation of technical issues and methods.	✓	
Ability to supervise a junior technician	✓	
Ability to relate to Academics of a high level	✓	
Ability to communicate with users over handling of animals during practical classes/research	✓	
Qualifications		
General qualification in a science subject – preferably in the Biological Sciences – or equivalent experience	✓	
Full driving licence	✓	
Competence in standard IT software packages, e.g. Word, Excel	✓	

Department of Zoology

The Department of Zoology provides an exciting research and teaching environment with a strong sense of collegiality and community. The Department has about 250 members who share a fascination with animal biology. Our community includes 23 University faculty, a further 16 principal investigators, around 100 postgraduate students, a vibrant post-doc community and a committed team of professional service staff. The Department is a member of the Cambridge Conservation Initiative (CCI), a unique partnership between conservation organisations and academic departments.

Research

Our mission is to define and answer the most important and exciting questions in animal biology thus delivering an outstanding contribution to knowledge with real-world benefits. We have particular research strengths in conservation science, evolutionary biology, ecology, behavioral ecology and developmental biology. Members of the Department belong to a range of the School's research themes including "Organisms, Evolution and Ecology", "Functional and Evolutionary Genomics", "Reproduction, Development and Lifelong Health" and "Neuroscience, Psychology and Behaviour".

The Department contributes to five cross school Interdisciplinary Research Centres; Conservation, Global Food Security, Cancer, Infectious Diseases and Neuroscience and an exciting new Collections-Connections-Communities strategic research initiative.

The Department has an outstanding Museum of Zoology that holds internationally

renowned collections that provide excellent research and teaching resources, and has its own strengths in collections-based conservation work. The Museum attracts over 150,000 visitors per year. It has a lively and innovative science outreach programme and hosts hundreds of visits by educational groups each year.

Teaching

We teach a range of courses in the Natural Sciences Tripos, working closely with other Departments in the School. These include first and second year courses in "Evolution and Behaviour", "Evolution and Animal Diversity", "Ecology Evolution and Conservation", "Cell and Developmental Biology" and "Neurobiology". Our final year "Part II Zoology" course is a modular course that reflects the research interests of the department and is delivered in close cooperation with other Departments. This allows our students to combine the study of evolutionary biology, ecology, conservation and behaviour, with genomics, cell and developmental biology and a range of other options. Students can focus on specific areas of Zoology or explore the diversity of the subject and the interface between disciplines and levels of analysis. Our teaching is rated very highly, by both external assessors and the undergraduates themselves.

Location and Facilities

The Department is based in the historic city centre of Cambridge and has very close links with the Cambridge Conservation Initiative, in which some members of the Department are based.

Working Environment

The Department of Zoology offers a stimulating, supportive and friendly work environment in a successful academic community. We have exceptional strengths in both field and laboratory based experimental work, as well as with *in silico* approaches, all supported by excellent research facilities.

We offer a range of activities to support career development, promote staff wellbeing and happiness and foster a healthy research culture.

As well as providing a proactive mentoring programme and annual staff development reviews, we have an active induction programme and facilitate training in a wide range of topics. The Department promotes staff wellbeing through diverse social events organised through the year.

We are uniquely positioned to contribute to life in our local community through the work of the Museum of Zoology, and encourage our staff to contribute to wide-ranging activities the Museum runs every year for different community groups.

Equality Diversity and Inclusion

We embrace and value the immense benefits of a diverse and inclusive community at work.

Working in the Department of Zoology

Working Environment

The Department of Zoology offers a stimulating, supportive and friendly work environment in a successful academic community.

We have exceptional strengths in both field and laboratory based experimental work in addition to theoretical approaches. The Department and School have excellent research facilities.

The Department provides a lively and successful research environment. We have a range of regular seminar series (e.g. Behavioural Ecology and Evolution, Evo Devo and Museum Research Talks) and an Annual Departmental Seminar Day. There is a wide range of seminars in the School and in Cambridge.

The Department has a proactive mentoring programme and provides annual staff development reviews. Probation includes regular meetings with a mentor and the Head of Department. We have an active induction programme and ongoing training in a wide range of topics.

Social life in the Department includes, when possible, various get-togethers throughout the year, happy hour, sporting and other wellbeing activities.

The Department values interactions with the wider community and there are opportunities to contribute to outreach through, for example, Museum activities, the Cambridge Festival, interactions with local schools and many others.

Equality Diversity and Inclusion

We embrace the immense benefits of a diverse and inclusive community. We are committed to fostering equality and inclusion, valuing diversity and promoting wellbeing all built on a foundation of mutual respect in our community.

We expect all members of our community to be actively involved in providing a stimulating, inclusive, respectful, and supportive work and study environment.

We fully and actively subscribe to both the University's Equal Opportunities Policy, the University's [Dignity@Work Policy](#), as well as promoting a wide range of diversity networks for women, black, Asian and minority ethnic, and lesbian, gay, bisexual, and transgender (LGBT+) staff and students.

We have an enthusiastic and effective Equalities and Wellbeing Committee and Race Equality sub-group, with members drawn from all sections of the department's staff and students.

The committee works hard to lead the department in implementing best practices in equality, diversity, inclusion, and wellbeing. This includes:

- Actively promoted and encouraged current staff to undertake equality and diversity training throughout their time in the department.
- Introduction and active promotion of Wellbeing Advocates in the Department.

The Department is pleased to hold a silver Athena Swan awarded in 2016.

The Museum of Zoology

The Museum of Zoology provides a relatively small home for a spectacular global collection, encompassing more than two million zoological specimens amassed over the course of more than two centuries. Just over 250,000 specimens are in the non-insect invertebrate collections, including the Robert McAndrew collection of molluscs and the John Stanley Gardiner collection of crustacea, each of which are rich in type specimens.

With substantial funding from National Lottery Heritage Fund, the Museum's building recently underwent a complete refurbishment – including the construction of a new glass-walled whale hall. During the refurbishment, the public galleries had a facelift, with vibrant new displays assembled and installed; staff offices and labs were upgraded; and the museum stores were completely emptied, rebuilt, and refilled. The Museum re-opened in 2018, attracting over 150,000 visitors and won plaudits for its work in public engagement that year through two awards, regionally and nationally. It received further national recognition for the programme of digital engagement it put on during 2020 and 2021.

Staff of the Museum includes the Director and five academic curators, all of whom combine research, teaching and curatorial responsibilities. The academic staff works with the Collections team, the Public Engagement team, and the Operation and Visitor Services team, which includes a large and active team of volunteers. The Museum is embedded in the Zoology Department and shares a building with the Cambridge Conservation Initiative (CCI). It is also part of the wider University consortium of Cambridge museums, the

UCM. The consortium works together in delivering a programme of public engagement and learning activities, including the hugely popular 'Twilight' events.

The consortium is also part of the new University-funded Strategic Research Initiative 'Collections – Connections – Communities'. It will use the University's collections, and their audiences, to convene new research addressing key societal issues of our time, relating to Environment and Sustainability; Public Health and Wellbeing; and Society and Identity. Ongoing work within the Museum of Zoology already falls within each of these themes. As well as projects on evolution, that explain how life on earth evolved and how it functions today, and conservation, which use the collections to document the decline in the natural world, to deduce new techniques for conserving and rebuilding biodiversity, there is work targeted towards improving the health and wellbeing of our audiences and uncovering the hidden histories behind the collections.

The Museum has associated molecular laboratories, and a high-resolution micro-tomography centre

Cambridge Conservation Initiative

[The Cambridge Conservation Initiative](#) (CCI) is a unique collaboration between the University of Cambridge and nine leading internationally-focused biodiversity conservation organisations based in and around Cambridge.

The CCI partners together combine and integrate research, education, policy and practice to create innovative solutions for society and to foster conservation learning and leadership. Our work spans disciplines, organisations and continents, with a core mission of conserving and restoring life on Earth.

This position will be based in CCI's hub in the David Attenborough Building – right at the centre of the largest cluster of conservation organisations in the world, and a place where leaders in academia, business, government and non-governmental organisations interact and work together on a daily basis.

Our city-centre location and strong convening power allow us to directly engage with a wide audience globally, from leaders in government, business, academic and NGO communities to the general public.

The School of the Biological Sciences

The School of Biological Sciences is one of six Schools of the University. In line with the University's mission, the academic vision of the School is the pursuit of education, learning and research at the highest international levels of excellence. We aim to work in innovative ways to achieve ongoing excellence in a supportive and collaborative research and teaching environment.

About the School

The research and teaching carried out in the School of Biological Sciences is diverse and covers animal, human, plant and microbial science from the atomic, molecular and cellular levels through to tissues, organs, whole organisms, populations, ecosystems, biodiversity and human behaviour. The research has impacts on health and disease across species, agriculture, conservation and the environment as well as on the pharmaceutical and biotechnology industries, with direct translational relevance to the clinic, public services and social policy, and the bio-economy.

The School is organised into nine Departments (Biochemistry; Genetics; Pathology; Pharmacology; Physiology, Development and Neuroscience; Plant Sciences; Psychology; Veterinary Medicine; Zoology) and four major interdisciplinary research institutes (Gurdon Institute; Wellcome-MRC Cambridge Stem Cell Institute; Sainsbury Laboratory; MRC Toxicology Unit) all of which are involved in fundamental biological research with varying contributions to undergraduate and postgraduate teaching.

The School has oversight of the Botanic Garden, the Herbarium and the Museum of Zoology through the Departments of Plant Sciences and Zoology respectively. The

School also contributes to the Cambridge Conservation Initiative, an unprecedented and highly successful amalgamation of cross-Schools groups and Non-Governmental Organisations.

The School of Biological Sciences employs around 2000 staff, teaching over 4000 students: 2000 of these are undergraduates in the Natural Sciences, Medical Sciences and Veterinary Sciences Triposes; the remaining 2000 are postgraduates.

Research Themes

Six cross-cutting Research Themes provide integration across the School and align with areas of significant research strength. They are designed to facilitate interactions across traditional departmental boundaries and all activities are founded in the principles of openness, inclusion and mutual respect. The Research Themes are:

- Molecules and Cells
- Infection and Immunity
- Neuroscience, Psychology and Behaviour
- Functional and Evolutionary Genomics
- Reproduction, Development & Lifelong Health
- Organisms, Evolution and Ecology

All academic staff within the School of Biological Sciences are invited to join and participate in the Theme(s) most relevant to their research. The Themes provide new opportunities for leadership across the School, bringing people together from a variety of perspectives and career stages, with Theme Lead applications actively encouraged from groups traditionally under-represented in such roles.

Culture and Inclusion

The School is working to deliver a thriving research culture so we can attract and retain the best researchers and empower them to do their best work. The School is home to a dynamic community committed to providing a working environment where all individuals feel valued and supported.

In line with University values and frameworks, we are proactively working to achieve an inclusive approach to equality, which supports and encourages all under-represented groups, promotes an inclusive culture and values diversity.

The University of Cambridge is a signatory to the San-Francisco Declaration on Research Assessment (DORA), and in recruitment or promotion evaluations will assess research on the basis of its merits rather than the journal or venue in which it is published.

Applicants should not include Journal Impact Factors or uncontextualized metrics in their applications.

For more information:

[Guidance on the Implementation of DORA Recommendations for Research Assessment](#)

Biological Sciences Early PI Network

The network offers peer-support and advice during the challenging transition to lab head, implements policies and ways of working to improve the experience of early Principal Investigators.

Terms of Appointment

Tenure and probation: The appointment will be made on a permanent basis. Appointments will be subject to satisfactory completion of a six-month probationary period.

Hours of Work and Working Pattern: The hours of work for the position are 36.5 hours per week, Monday to Friday, working on-site. The post-holder will be required to work one or two weekends per month and be on call for dealing with animal care concerns or unforeseen circumstances such as power cuts.

Pension: You will automatically be enrolled to become a member of CPS (Contributory Pension Scheme) – a defined benefit and defined contribution pension scheme. For further information please visit the [University Pensions](#) website.

Annual leave: Full time employees are entitled to annual paid leave of 36 days inclusive of public holidays. For part-time employees, annual leave will be pro rata'd based on days worked.

Pre-employment checks

Right to work in the UK: We have a legal responsibility to ensure that you have the right to work in the UK before you can start working for us.

If you do not have the right to work in the UK already, any offer of employment we make to you will be conditional upon you gaining it.

Health declaration: Once an offer of employment has been made the successful candidate will be required to complete a work health declaration form.

Qualifications: The person specification for this position lists qualifications that are essential and/or desirable. Please note that if you are offered the post you will be asked to provide your relevant original certificates of these qualifications.

References: Offers of appointment will be subject to the receipt of satisfactory references.

Screening Checks:

This role requires a basic disclosure and a security checks. The nature of this role means that the successful candidate will also need to undergo a

health assessment. Any offer of employment we make to you will be conditional upon the satisfactory completion of these checks, whether an outcome is satisfactory will be determined by the University.

Equality and Diversity

We particularly encourage candidates from a Black, Asian and Minority Ethnic background to apply for this vacancy as they are currently under-represented at this level within our University.

Information if you have a disability

The University welcomes applications from individuals with disabilities. ^{SEP}We are committed to ensuring fair treatment throughout the recruitment process. We will make adjustments to enable applicants to compete to the best of their ability wherever it is reasonable to do so and, if successful, to assist them during their employment. Information for disabled applicants is available on the [support services section on the HR website](#).

We encourage you to declare any disability that you may have, and any reasonable adjustments that you may require, in the section provided for this purpose in the application form. This will enable us to accommodate your needs throughout the process as required. However, applicants and employees may declare a disability at any time.

If you prefer to discuss any special arrangements connected with a disability, please contact, Mrs Anastasia Nezhentseva, HR and Grants Administrator, who is responsible for recruitment to this position via: an286@cam.ac.uk.

Alternatively, you may contact the HR Business Manager responsible for the department you are applying to via: hrenquiries@admin.cam.ac.uk.

The University

The University of Cambridge is one of the world's oldest and most successful universities. We are a renowned centre for research, education, and scholarship that makes a significant contribution to society. The University is consistently ranked amongst the top universities in the world. Our affiliates have won more Nobel Prizes than any other University.

Our sustained pursuit of academic excellence is built on a long history of first-class teaching and research within a distinctive collegiate system. For eight centuries our ideas and innovations have shaped the world. Our principal goal is to remain one of the world's leading universities in an increasingly competitive global higher education sector. Today the University of Cambridge is at the centre of a cluster of over 4,300 businesses employing 58,000 people.

Our capital investment projects include the West Cambridge site, the North West Cambridge development and the growth of the Biomedical Campus in the south of the city. The North West Cambridge development includes the opening of a primary school – the first in the UK to be managed by a University. So we are deeply embedded in, and committed to serving, our local community. These are all conspicuous signs of a University that is not only adapting to new needs, but also anticipating the future.

Our mission is to contribute to society through the pursuit of education, learning, and research at the highest international levels of excellence. Our core values are:

- freedom of thought and expression; and
- freedom from discrimination.

About Us

The University is one of the world's leading academic centres. It comprises 150 faculties and departments, together with a central administration and other institutions. Our institutions, museums and collections are a world-class resource for researchers, students and members of the public representing one of the country's highest concentrations of internationally important collections.

The University has an annual income of £2 billion. Research income, won competitively from the UK Research Councils, the European Union (EU), major charities and industry, exceeds £500 million per annum and continues to grow.

The Colleges and the University remain committed to admitting the best students regardless of their background and to investing considerable resources both in widening access and financial support. The 31 Colleges are self-governing, separate legal entities which appoint their own staff. Many academic staff are invited to join a College as a Teaching Fellow, which provides a further social and intellectual dimension. The Colleges admit students, provide student accommodation and deliver small group teaching.

The University awards degrees and its faculties and departments provide lectures and seminars for students and determine the syllabi for teaching and conducting research.

Our instinct for seeking out excellence and setting up enduring and mutually beneficial collaborations has led us to establish strategic partnerships across the globe. Whether it is the successful Cambridge-Africa Programme involving universities in Ghana, Uganda and elsewhere on the African continent; or the close association with the government of India to pursue new research in crop science; or the creation, with Germany's Max Planck Institutes, of a Cambridge-based centre for the study of ethics, human economy and social change – international partnerships are now an inextricable part of the University's make-up.

“Through its outstanding education, research and innovation, the University of Cambridge has made – and continues to make – a lasting

contribution to human knowledge and flourishing. By working at the University of Cambridge, you will be joining a vibrant community of students, scholars and

professional services staff committed to supporting and enhancing the University's mission to contribute to society.”

Professor Deborah Prentice, Vice Chancellor

Working at the University

Working at Cambridge you will join a diverse, talented and innovative community, with more than 18,000 students and over 16,000 staff from all walks of life and corners of the world.

The University continually explores strategies to attract and retain the best people. It is committed to supporting its staff to achieve their best. We are a fair, diverse and inclusive society and we believe our staff are our greatest asset. There is strong commitment to developing institutional leadership and supporting and encouraging staff development at all levels.

We offer a variety of roles including academic, research, professional, managerial and support roles. We also offer extensive benefits and excellent learning opportunities within a stimulating working environment.

The University's estate is undergoing the most significant transformation in its history. Cambridge has been able to create a new science and technology campus to the west of the city centre, and is now expanding further to the north west of Cambridge including investing in affordable homes for University key workers and community facilities. Even with our continued development, the University remains within walking or cycling distance across the campus. The University is a major partner on the Cambridge Biomedical Campus and we continue to redevelop our historic city centre sites demonstrating our determination to ensure that we can offer the best facilities and opportunities for our staff and students.

Equality & diversity

The University has built its excellence on the diversity of its staff and student community. We aim to be a leader in fostering equality and inclusion, and in promoting respect and a sense of belonging for all. We encourage applications from all sections of society. All appointments are made on the basis of merit. We have an Equal Opportunities Policy, along with a range of diversity networks for women, black and minority ethnic and lesbian, gay, bisexual and transgender staff. More details are available on [Equality and Diversity](#) webpages.

The University has a bronze Race Equality Charter award, with framework for improving the representation, progression and success of minority ethnic staff and students within higher education. Furthermore, the University's Athena SWAN award recognises and celebrates good practice in recruiting, retaining and promoting women.

Living in Cambridge

Cambridge is rich in cultural diversity. From beautiful University and College buildings, museums and art galleries, quaint gardens and punts on the River Cam, to a vibrant restaurant and café scene, our employees are surrounded by the wonderful features of this unique city.

You can find a wide-range of high street shops and 3 shopping centres, with independent alternatives at the historic market and nestled within the passageways in the city centre. You will find a cinema, bowling alley, a nightclub and various live performances At the Cambridge Leisure Park, with further entertainment options at the Corn Exchange, Arts Theatre and the ADC Theatre. Further information can be found on the Visit Cambridge website.

If you prefer the faster pace of life, London is a 45 minute train journey away. For those travelling from overseas, Stansted Airport is just 45 minutes away and Heathrow Airport under 2 hours away. The University is a short distance from a host of other attractions such as Ely Cathedral, Newmarket Races and various wildlife parks and stately homes. Cambridge is also within easy reach of the beautiful Broads and coastlines of Norfolk and Suffolk.

Relocation Support

The University recognises the importance of helping individuals to move and settle into a new area. We provide support and guidance to those relocating internationally or domestically to take up a post at the University of Cambridge, liaising with other University offices and selected partners to ensure comprehensive relocation support is available. This includes: accommodation, childcare, schools, banking, immigration and transport. If you would like further information, please visit the [Relocation Service - Accommodation Service](#) The Shared Equity Scheme and the Reimbursement of Relocation Expenses Scheme provide financial assistance to qualifying new members of staff with the costs of relocating to Cambridge.

Accommodation Service

The University Accommodation Service helps staff, students and visiting scholars who are affiliated to the University in their search for suitable accommodation in Cambridge. The dedicated accommodation team can provide access to a wide range of University-owned furnished and unfurnished properties, and has a database of private sector accommodation available for short and long-term lets. For further information and to register with this free service please visit the [Accommodation Service](#) website.

What Cambridge can offer

We offer a comprehensive reward package to attract, motivate and retain high performing staff at all levels and in all areas of work.

The University offers a wide range of competitive benefits, from family leave entitlement, to shopping and travel discount schemes. Our generous annual leave package contributes to the positive wellbeing of our University employees. Sabbatical leave enables academics to focus on research and scholarship, whilst still maintaining their full salary. The University also has a [career break scheme for academic and academic-related staff](#), with additional flexible working policies for all other staff.

Pay and benefits

The University salary structure includes automatic service-related pay progression in many of its grades and an annual cost of living increase. In addition to this, employees are rewarded for outstanding contribution through a number of regular pay progression schemes. The University offers attractive pensions schemes for employees, with an additional benefit of a salary exchange arrangement providing tax and national insurance savings. Payroll giving is also a simple, tax-efficient way for employees to make monthly donations to charity.

CAMbens employee benefits

We offer a CAMbens scheme for University employees, providing access to online and in-store shopping discounts and cashback. With more than 2,000 participating retailers, employees can save money on a wide range of household expenses, from groceries and clothes, to holidays and insurance and much more. A range of local discounts are also available, helping employees to save money whilst also supporting local Cambridge businesses. ACAMBens Cycle to Work salary sacrifice scheme is also available, which enables employees to save money on transport costs. An interest free travel to work loan is also available for staff of the University.

What Cambridge can offer

Family-friendly policies

The University recognises the importance of supporting its staff. We have a range of family-friendly policies to aid employees' work-life balance including a generous maternity, adoption and shared parental leave entitlement of 18 weeks full pay and emergency family care support.

Other family-friendly support includes:

Our highly regarded workplace nurseries, a childcare salary exchange scheme and a high quality holiday Playscheme may be available to help support University employees with caring responsibilities (subject to demand and qualifying criteria). Further childcare information can be found on the [Childcare Office](#) website.

The [Newcomers and Visiting Scholars Group](#) is an organisation within the University run by volunteers whose aim is to help newly arrived wives, husbands, partners and families of Visiting Scholars and members of the University to settle in Cambridge and give them an opportunity to meet local people. [The Postdoc Academy](#) supports the postdoctoral community within Cambridge.

Your wellbeing

The University's Sport Centre, Counselling Services and Occupational Health are just some of the support services available to University employees to promote their physical and mental wellbeing. There are many societies in Cambridge catering for almost every taste and interest. Whether you want to take part in a sport, participate in music or drama, pursue a hobby, or join a political group, you will almost certainly find that a society exists for this purpose. The University also hosts the interdisciplinary [Cambridge Festival](#), as well as [Open Cambridge](#) weekend, which together attract over 50,000 visitors per year. The festivals are a great opportunity to get your first taste of public engagement, through volunteering, supporting hands-on activities or proposing a talk.

Development opportunities

We support new employees to settle in through various activities. The encouragement of career development for all staff is one of the University's values and we put this into practice through various services and initiatives. Our Personal and Professional Development Department provides development opportunities and courses for all University employees. These include face-to-face sessions, online learning modules and webinars. Employees may also apply for financial support to undertake training that will lead to a qualification. We offer reduced staff fees for University of Cambridge postgraduate courses and the opportunity to attend lectures and seminars held by University departments and institutions. The [CareerStart@Cam programme](#) also supports employees in assistant staff roles who do not hold higher education qualifications to develop their skills, experience and qualifications.

How to apply

Applications should be submitted online via the [University of Cambridge jobs page](#) by clicking “Apply online” in the job advert. You will need an email address to register for our online system.

Please note: The University is unable to issue sponsorship under the Skilled Worker Visa route for this role as it does not meet the minimum salary requirements.

Informal enquiries are welcomed and should be directed to:

Sylviane Moss

Email: smmc2@cam.ac.uk

If you have any queries regarding the application process please contact **Anastasia Nezhentseva**

Email: an286@cam.ac.uk

The closing date for applications is 12th January 2025.

Interviews will be held during the week beginning 20th January 2025.
